ITEM

As a result of the new developments in Arua City, many of the residents of the city are forced to relocated as the city authorities are constructing new roads and other infrastructures. This has made many of the residents to relocate along the banks of the River Enyau. But it has been reported that these people do farming along the riverbanks in which they apply agrochemicals on their farms, wash cars in the river and also dump their domestic and kitchen wastes into the river. This has caused a lot of problems to the community living along the banks of River Enyau.

Task

Explain:

- a) To the community the challenges they have caused as a result of their activity
- b) To the community why they would need to conserve this river

Item 2

There has been a serious battle between Ayivu Development Agency and a politician over the takeover of Barifa Forest. The agency is planning to transform it into an ecocity with a lot of infrastructures such as stadiums, recreational centers and other developments. This did not go well in the ears of some prominent natives of Ayivu who advocated that Barifa must be saved.

Task

Explain to the locals in Ayivu;

- a) How destroying this prestigious resource may affect the city.
- b) Why they would need to conserve this resource
