

1 a) - Photosynthesis ✓ u1

- Gaseous Exchange / Respiration ✓ u1
- Pollination / fertilisation / Reproduction / fruit formation
- Transpiration

b) The conditions caused drooping of the leaves, reducing surface area for trapping sunlight hence reducing the rate of photosynthesis ✓ u1

The conditions caused closure of flowers petals which hindered pollination hence affecting fruit formation / fertilisation ✓ u1

The conditions caused closure of the stomata which reduced gaseous exchange hence affecting respiration and photosynthesis ✓ u1

c) Opening of flower petals in the morning when transpiration rate is low to allow pollination with minimal water loss ✓ Ae

Drooping of leaves reduced surface area for water loss hence reducing rate of transpiration ✓ Ae

The hairs on the leaves trapped a layer of moisture / vapour to reduce the rate of transpiration ✓ Ae

Leaves straighten in early morning hours to increase the surface area for trapping sunlight for photosynthesis with minimum water loss ✓ Ae

Flower petals remained closed; to reduce rate of transpiration ✓ Ae

3 or more Ue = 6	3 or more Ae = 6
2 Ue = 5	2 Ae = 5
1 Ue = 4	1 Ae = 4
Ue = 1	Ae = 2

2a) - Damage to body organs due to effect of chemicals in petrol / smoke from marijuana resulting into health complications and mental disorders / damage to body organs / health complications / mental disorder caused by dangerous chemicals in petrol and marijuana. ✓_{ue}

- Death from drug abuse / violence / damage to body organs / health complications / mental disorder from chemicals / Mob justice from violence ✓_{ue}

Imprisonment due to crime / violence / chaos ✓_{ue}

Societal / family neglect / rejection due to drug abuse / crime / bad peer groups ✓_{ue}

Addiction due to continued use of drugs. ✓_{ue}

b) - Ears heard the sound and impulses were sent to brain ✓_{ue}

- The brain stimulated adrenal gland to release adrenaline ✓_{ue}

- The adrenaline increased heartbeat rate ✓_{ue}

- The heart pumped more blood to muscles hence faster supply of oxygen and nutrients to generate / facilitate high rate of respiration to generate energy required for faster muscle contraction ✓_{ue}

- Rapid and faster muscle contraction and relaxation caused him to run faster and reach home ✓_{ue}

c) - Guidance and counselling to know the dangers associated with being in such groups and know what to do ✓_{ue}

- stay away from bad peer groups and drugs to avoid the temptation of using the drugs ✓_{ue}

- Engage in productive activities to avoid idleness that would lead into the temptation of using drugs ✓_{ue}

- Go for rehabilitation / medical treatment to stop /

reverse the effects of drug abuse ✓ Ae

2 + Ue in (a) and 1 + Ue in (b) or vice versa } = 5

1 + Ue in (a) and 1 + Ue in (b) or } = 4
2 + Ue in any of a or b

U1 = 1

1 Ae = 5

AL = 2

3 a) - There is a chance of having a normal baby since it is a genetic condition based on probability during fertilisation ✓ Ae

Haemophilia can be managed in hospitals by administering clotting factors in case of physical injuries ✓ Ae

Abortion is illegal in Ugandan Laws which may lead them into jail ✓ Ae

Abortion can lead to death of the mother from excessive bleeding if not carried out properly ✓ Ae

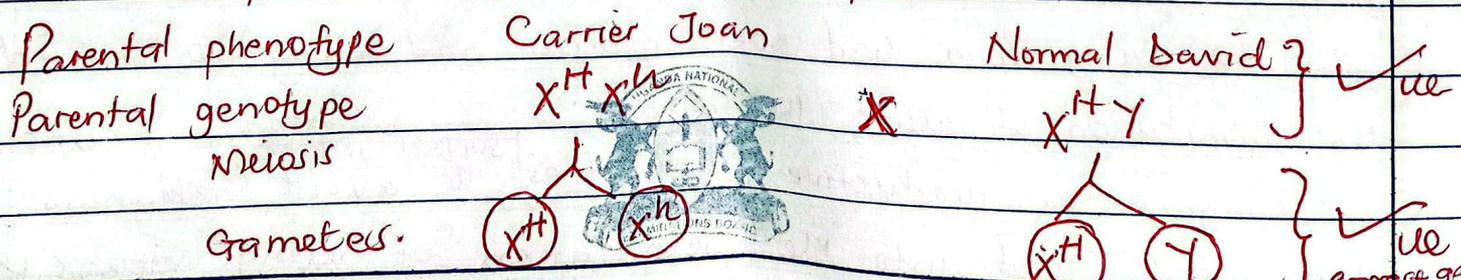

increased risk of infections to the reproductive system if done in an unsafe environment / not treated properly ✓ Ae

May lead to mental health disorders due to the psychological distress and guilt of doing something immoral / illegal ✓ Ae.

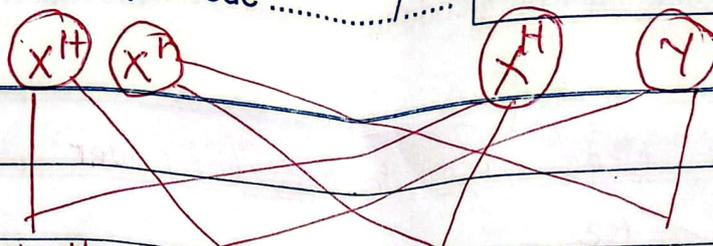

b) Haemophilia is sex-linked Joan is a carrier and David is normal since he has no symptoms.

Let H represent allele for normal blood clotting

Let h represent allele for haemophilia

Gametes

Fertilisation

offspring genotypes

$X^H X^H$ $X^H Y$ $X^H X^h$ $X^h Y$

offspring phenotypes

Normal girl Normal boy Carrier/Normal girl Haemophilia boy

- Immediate and timely medication to stop bleeding in case of physical body injuries / to replace lost blood ✓ ue
- Guidance and counselling to provide psychological support to the plants ✓ Ae
- Take proper care of the child to avoid risky situations that can expose the child to physical injuries protective gear when playing etc ✓ Ae
- Proper nutrition with foods that can increase volume of blood ✓ Ae

2 or more ue = 6 5 or more Ae = 6
 1 ue = 4 1 - 4 Ae = 5
 Ae = 3

Clearing the land destroyed the vegetation cover exposing the soil to erosion / destroying habitats for animals / removing wind breaks / leading to green house effect / loss of medicinal plants / loss of food ✓ ue.

- Monocropping / growing maize only caused nutrients exhaustion leading to soil infertility ✓ ue
- Destroying ant hills with chemicals killed termites that would help in soil aeration / break down plant remains to improve soil fertility ✓ ue

Application of fertilisers affected soil pH / some were carried away into water bodies causing water pollution / death of aquatic organisms ✓ ue NB for a ue, the activity must be attached to

Downloaded from www.nutoonline.com, you can download more pastpapers

- 4 b) Shrubs and trees provide soil cover which prevents soil erosion ✓ Ae
- Trees / shrubs / antihills are habitats for several organisms ✓ Ae
- Conserving indigenous tree species promotes tourism / Employment / study purpose ✓ AL
- Termites and indigenous trees are source of food ✓ Ae
- Leaves from trees decompose to release nutrients for plant growth / termites improve soil aeration and soil drainage ✓ Ae
- Shrubs and trees provide oxygen for respiration ✓ Ae
- Trees prevent air pollution ✓ Ae
- Indigenous trees / shrubs are source of herbal medicine ✓ Ae
- Trees help in rainfall formation ✓ Ae
- Trees can act as wind breakers ✓ Ae.

All benefits that are not beneficial to living things in natural ecosystem are coded AI

- 3 or more Ae = 5
- 2 Ae = 4
- 1 Ae = 3
- all = 1
- 2 or more Ae = 6
- 1 Ae or AI = 5

- Timber cutting removes big trees that act as wind breaks exposing the area to strong winds / removes trees that would hold soil particles together exposing the soil to mudslides ✓ Ae
- Tearing of Cattle compacts soil leading to poor drainage which facilitates rapid surface water run off to the valleys causing flooding / over stocking leaves land bare facilitating rapid surface run off hence floods in the valley / Animal movements creates routes / paths which result into gulleys hence rapid water run off to valleys causing floods. ✓ Ae
- Bush Crop gardening loosens the soil structure leading to mudslides ✓ Ae

Bush burning destroys humus / removes leaves that would form humus weakening soil structure hence loosening the soil particles exposing it to mudslides / removes vegetation cover that exposes the soil surface to rain water leading to mudslides ✓ Ue

Charcoal burning removes big trees that act as wind breaks exposing the area to strong winds / removes trees that would hold the soil particles together exposing the soil to mudslides ✓ Ue

Digging up and down the slopes loosens the soil particles exposing it to mudslides / creates channels for water run off leading to flooding of the valleys ✓ Ue

How the challenges can be overcome:

- Strict laws against charcoal burning and timber cutting to conserve trees / vegetation cover preventing strong wind and mudslides ✓ A

- Use alternative sources of fuel / building materials to conserve the trees to prevent strong winds and mudslides ✓ Ae

- Carry out good farming practices like contour ploughing, terracing, agroforestry, zero grazing etc to reduce speed of surface water run off preventing floods and mudslides ✓ Ae

- Sensitising the people on the dangers of bush burning, timber cutting, charcoal burning ✓ Ae

- Reforestation to restore trees and prevent strong winds and mudslides ✓ Ae

- Resettlement / relocation of people to allow regeneration of vegetation cover ✓ Ae

b) - Thick Vegetation provides soil cover / holds soil particles together which prevents soil erosion / mud slides / flooding ✓ Ae

- The Vegetation is a habitat for wild animals ✓ Ae

- Trees act as wind breakers ✓ Ae

- Vegetation is source of food ✓ Ae

- Vegetation is source of herbal medicine ✓ Ae

- Trees prevent air pollution by absorbing Carbon dioxide ✓ Ae

- Trees help in rainfall formation ✓ Ae

- Trees provide Oxygen for respiration ✓ Ae

- To maintain soil fertility for plant growth ✓ Ae

4 or more Ae = 5

2-3 Ae = 4

1 Ae = 3

Ae = 1

1 Ae from solution = 6

2 Ae from benefits = 6

1 Ae from benefits = 5

Ae from solution / benefits = 5

a) - Hitting the head damaged the brain disrupting the nervous control of activities leading to unconsciousness ✓ Ae.

- Losing a lot of blood reduced blood volume / reduced blood pressure hence low supply of oxygen / nutrients to the brain leading to unconsciousness. ✓ Ae

- Injured the kidneys resulting into accumulation of metabolic wastes / water leading to malfunctioning of body organs ✓ Ae

b) - All can donate to John except the mother ✓ Ae

- Cousin and sister can donate to John because he cannot produce antibodies against antigens A and B in their blood ✓ Ae

- The brother can donate to John because the brother's blood lacks antigens that can trigger antibody production ✓ Ae
- The mother cannot donate to John because her blood has hepatitis B which can be transmitted through blood transfusion ✓ Ae
- The sister can also donate because they have the same blood group.

$$3 \text{ or more Ue} = 6$$

$$2 \text{ Ue} = 4$$

$$1 \text{ Ue} = 3$$

$$\text{Ue} = 2$$

$$3 \text{ Ae} = 6$$

$$2 \text{ Ae} = 5$$

$$1 \text{ Ae} = 3$$

$$\text{Ae} = 1$$

7 Passive smoking affected her respiratory system and it could not effectively meet the demand for respiratory gases needed during sports ✓ Ue

Her HIV positive status weakened her immune system exposing her to frequent illness weakening her body hence not able to perform in sports ✓ Ue.

Malaria destroys red blood cells, thus reducing oxygen supply to respiring tissues ✓ Ue

Poor appetite results into inadequate nutrients intake hence insufficient energy required for sporting activities ✓ Ue

Heart diseases reduced the working rate of the heart hence not able to pump and supply enough blood with oxygen and nutrients to tissues / body organs ✓ Ue

Respiratory diseases caused malfunctioning of respiratory system affecting gaseous exchange ✓ Ue.

b) - Relocate / protect against mosquito bites to prevent malaria ✓ Ae (or an environmental friendly method of controlling mosquito bites)

↳ seek medical care / treatment against diseases she is suffering from ✓ Ae

Her husband should seek counselling to help him stop smoking so that Chandira is not exposed to passive smoking. ✓ Ae
Proper nutrition to boost her body immunity / energy production / body building. ✓ Ae

EOC₂ Understands how plants obtain and use nutrients to meet their requirements during which raw materials are carried to and from various organs in plants

Downloaded from www.nutoonline.com, you can download more pastpapers

Item	Code	Descriptor	Score
1	U ₂ (4)	Describes 3 or more ways how the conditions experienced affected the functioning of the plants which led to poor yields	6
	U ₂ (3)	Describes 2 ways how the conditions -----	5
	U ₂ (2)	Describes 1 way how -----	4
	U ₂ (1)	Mentions any process that was affected by the conditions --	1
	A ₂ (4)	Explains 3 ways how the pumpkins managed to survive the conditions experienced	6
	A ₂ (3)	Explains 2 ways -----	5
	A ₂ (2)	Explains 1 way	4
	A ₂ (1)	Lists / outlines / states	2
2	EOC ₄	Appreciates how human body coordinate various activities and adjust to ensure normal functioning of body system	
	U ₄ (3)	Explains two challenges Donald may face and describe partially the process how Donald's body coordinated and made him reach home.	5
	U ₄ (2)	Explains any one challenge ---	4
	U ₄ (1)	Lists / states any challenge	1
	A ₄ (2)	Explains any one ways Donald avoid the challenges associated with being in such a group	5
	A ₄ (1)	Lists / outlines / states any ways -----	2
3	EOC ₅	Appreciates how characteristics are inherited in living organisms passed to generation through reproduction and are manifested as organisms grow.	

Downloaded from www.nutoonline.com, you can download more pastpapers

Item	Code	Descriptor	Weight Score
	U5(2)	Describes or shows any <u>two</u> or more steps of a sex-linked genetic cross i.e. (i) introduction/defined symbols. (ii) Parental genotypes and phenotypes (iii) gamete formation (iv) fertilisation (v) genotypes of offsprings (vi) phenotypes of offsprings.	6
	U5(1)	Describes or shows any one step of sex-linked genetic cross	4
	A5(3)	Explains five reasons why Joan should not take board's advice and/or what should be done to manage the challenges associated with the conditions of their son	6
	A5(2)	Explain 1-4 reasons	5
	A5(1)	Lists/Outlines/States without reasons why Joan should not	3
	EOC 1	Appreciates diversity of living things and Sustainability of natural resources.	
Item 4	U1(4)	Explains 3 or more challenges Mr Ouma caused to the environment associated to named natural resources affected	5
	U1(3)	Explains 2 challenges	4
	U1(2)	Explains 1 challenge	3
	U1(1)	Outlines challenge	1
	A7(2)	Mentions two or more importance why Mr Ouma should conserve his env't all of which should be to living things	6
	A7(1)	Mentions any importance of the natural resources conserved	5
Item 5	U1(4)	Explains four or more ways how the different activities caused challenges	5
	U1(3)	Explains 3 or two ways	4
	U1(2)	Explains one way	3
	U1(1)	Outlines without explanation	1

Item	Code	Descriptor	Score
	A ₁ (2)	Detailed solution(s) to at least one of the challenges identified or Mentions 2 or more of the benefits of Conserving such a hill to the Community, all of which shd be to living things	6
	A ₁ (1)	Outlines / lists without detailed solutions to the challenge; identified or Mentions one benefit	5
	EOC ₃	Understands how mammals obtain and use nutrients to meet their energy requirements during which raw materials and products are carried to and from various organs involved.	
Item 6	U ₃ (4)	Explain 3 ways how the accident affected the function of John's body	6
	U ₃ (3)	Explain 2 ways	4
	U ₃ (2)	Explains 1 way	3
	U ₃ (1)	Only lists	2
	A ₃ (4)	Explains 4 reasons why Identifies the potential donor and suggest 3 reasons why	6
	A ₃ (3)	Identifies 2 reasons	5
	A ₃ (2)	Identifies 1 reason	3
	A ₃ (1)	Identifies the potential donor without giving reasons	1
Item 7	U ₃ (4)	Explains 4 reasons why chardine's performance in sports had decline	6
	U ₃ (3)	Explain 2-3	4
	U ₃ (2)	Explain 1	3
	U ₂ (1)	Exp only to the	2
